STRATEGY WITH DEPRESSION
MADURESE TEENAGERS

Sofia Retnowati

Universitas Surabaya

The correlation between self-esteem, depression in Madurese and Javanese teenagers between Madurese and Javanese

and Javanese teenagers. They are in Jakarta in Central Java and SMAN 1. The sampling technique is used as the data in the study is given four kinds of scale. Self-esteem scale, assertivity scale, and analysis used double regression and

there is correlation between self-esteem and depression in Javanese and (2) there are differences grade of depression of teenagers (depression of Javanese $M=19,44$). Total contribution of self-expression is 30,4 %, and the best result is about 61,5 % depression in madurese teenagers it's caused by Coping Strategy.

Strategy, Depression, Javanese and

FESTIVALS AS UNIQUE TRADITIONS TO PROMOTE COLLECTIVE EFFICACY AS
WAY FOR COMMUNITY ENABLEMENT: A CASE STUDY OF FESTIVITIES IN
PONTIANAK, SINGKAWANG, AND CIREBON

Tji Beng Jap, Sri Tiatri, Bernard Amadeus Jaya

Tarumanagara University

Festivals such as Spring and Lantern Festival are Chinese Indonesians' main celebrations of traditional cultural events. Over the years, influences from local culture have merged into the festivities to form the current unique ways of celebrations. Local residents also participated enthusiastically in these annual events. This qualitative study explored the involvement of the peoples at these events, namely the Spring Festival in Pontianak and Singkawang, West Borneo, and the Lantern Festival in Cirebon, West Java. Data were collected through semi-structured interviews and field observations during the festivities. The findings showed community engagement and participation yields a formation of collective efficacy (Bandura et al, 2011, Mancini et al. 2007) amongst the Chinese Indonesians and local residents mainly through social learning. Consequently, it creates conducive environment through a voluntary community enablement which promotes healthy relationship in human development.

Keywords: *Festival, collective efficacy, voluntary community enablement*
