BAB I

PENDAHULUAN

A. PERMASALAHAN

1. Latar Belakang Masalah

Pandemi merupakan suatu wabah penyakit menular yang terjadi dalam ruang lingkup global dengan risiko tingkat kematian yang tinggi. Pandemi telah terjadi sejak dari tahun 541, dengan kasus pertamanya yakni pes bubonik atau yang dikenal dengan “wabah *Justinian*” ini telah memakan korban hingga 10% dari populasi Konstantinopel (Kementrian Kesehatan, 2020). Berbagai macam pandemi yang pernah menggemparkan di berbagai belahan dunia antara lain *black death*, flu spanyol, cacar, HIV/AIDS, korela dan SARS. Pandemi sendiri dapat terjadi akibat dari penularan virus atau bakteri yang dibawa atau berasal dari hewan dan menjangkit tubuh manusia kemudian ditularkan antarmanusia. Secara langsung maupun tidak langsung, dengan adanya pandemi akan menghambat segala kegiatan maupun proses baik dalam berbagai sektor seperti sosial, ekonomi, dan politik. Menurut (Jamison, *et al.*, 2017), semenjak abad terakhir diperkirakan pandemi telah mengalami peningkatan dikarenakan urbanisasi, eksploitasi lingkungan alam yang lebih besar, perjalanan dan integrasi global serta perubahan penggunaan lahan. Trend pandemi ini kemungkinan besar tidak akan pernah ada habisnya dan akan terus berlanjut seiring dengan perkembangan zaman. Bahkan kemungkinan besar yang menjadi penyebab terjadinya pandemi adalah influenza. Berdasarkan alat analisis, tingkat probabilitas satu persen influenza dapat mengakibatkan kematian 6 juta jiwa terkait pneumonia dalam jangka waktu tertentu.

Pada tahun 2019, dunia tengah digemparkan dengan adanya pandemi virus baru yaitu COVID-19 yang ditemukan pertama kali di Wuhan. COVID-19 adalah virus korona jenis baru yang disebut juga SARS-CoV-2 dan tergolong dalam virus *pneumonia* (World Health Organization, 2020). Penyebaran virus ini pun sangat pesat dan telah menginfeksi jutaan manusia hingga ke seluruh belahan dunia, termasuk Indonesia.
